

enviro

recycled custom display

PRODUCT LOOK

a solution for environmentally responsible displays

Creative

Create your own design or let our designers do this for you. Use any size shape or combination of panels, that link together to create a freestanding, lightweight display that is 100% recyclable!

Recycle

Enviro uses X-Board, which is manufactured from 96% recycled paper waste. We print using VOC free UV ink which is non-toxic and biodegradable. Once you've finished with the display it is 100% totally recyclable in paper waste.

Flexible

The product is lightweight, up to 75% lighter than MDF. We can cut, shape and contour the boards.

Cost savings

Save substantial costs on installation and transport. Set-up and installation of the display is easy and does not always require a specialist to install.

100% Recyclable after use.
Boards use 96% recycled paper waste.
Printed with VOC free ink.
